

SAI RAM NARISHE

B.Tech Computer Science Engineering Student

9392740580 ramreviver5577@gmail.com <https://www.linkedin.com/in/sai-ram-2aa3b3251/> Tirupati, Andhra Pradesh, India

SUMMARY

I am a highly motivated and detail-oriented B.Tech Computer Science Engineering student with experience in hands-on development and implementation of various projects. Proficient in languages like Java and HTML, I possess a solid foundation in real-time engineering concepts, data analysis, and algorithm techniques, making me well-prepared for challenges in the tech field

EDUCATION

Schooling

Sri Prakash Vidyaniketan

- 96.2%

Payakaraopeta

06/2019 - 05/2020

Intermediate

Sri Prakash Vidyaniketan

- 92%

Payakaraopeta

06/2020 - 07/2022

B.Tech in Computer Science Engineering

Mohan Babu University, [GPA 9.1/10](#)

Tirupati

08/2022 - Present

STRENGTHS

Communication

Strong communication skills that facilitate teamwork and engagement

Problem Solving

Excellent problem-solving abilities to tackle challenges efficiently

SKILLS

Github, Java, HTML, CSS, SQL

INTERESTS

Volunteering for ISTE(Executive for CSE)

Involved in organizing and gathering various technical events

KEY ACHIEVEMENTS

Coding Challenge Winner and Website Development

Led a team of 3 and secured 1st place in a university coding competition, which highlights strong leadership and technical skills. Additionally, I built a user-friendly website featuring over 100 books that received positive feedback for its design

Top Contest Performer

Ranked in the top 5% out of 300+ participants in a national programming contest showcasing coding expertise

PROJECTS

Weather App

<https://github.com/Sairam2255/weather-app1>

An HTML, CSS, JavaScript, React (MERN) project for a weather forecasting application

- Developed a user-friendly weather forecasting application using HTML, CSS, JS
- Integrated real-time weather data through OpenWeatherMap API, providing current and forecasted conditions
- Implemented features such as location-based search, customizable units in Celsius/Fahrenheit, and responsive design for mobile and desktop platforms

MechA-Z

Developed a real-time vehicle assistance web application using React.js and Firebase that helps users find nearby mechanics using GPS and map integration. Implemented Google authentication, mechanic dashboards, Firestore database storage, responsive Bootstrap UI, and real-time location-based mechanic discovery.
